

Career Minded is not just another recruitment agency. We focus on forming long lasting relationships with both our clients and applicants thereby offering both parties the best service at all times.

We have learned that in this industry quality is of greater value than quantity.

We have aligned ourselves with some of the top recruiters within the IT and finance industry and in this way we are able to serve our clients across two very important fields within the business.

We specialize in the areas of IT and finance and predominantly serve clients in the Gauteng area. We only recruit within our specialised fields, assuring both client and candidate of expert attention, knowledge and advise within their niche areas.
